Case Study

DIRECT ENERGIE

CLIENT A major challenger in a nearly monopolized energy industry.
CHALLENGE Convert audiences who know nothing about Direct Energie and its benefits.

Segmentation

To target *New Audiences*, (i.e. users who have never interacted with the brand), Direct Energie has activated 4 *Personas* who share the same values with those of the brand. Each *Persona* corresponds to an *homogeneous* Facebook segment in terms of personality, values & codes of communication.

Targeting & messaging

Personas were split between the 4 stages of the conversion funnel, based on their state of engagement with Direct Energie. They were (re)targeted each step of the way down the funnel with Ads adapted to their *Persona* profile & their placement in the funnel.
